Nicholas Carchidi

The Franklin Institute's DISCOVERY CAMP
Teacher Recommendation Form

1. How does this student demostrate a desire to learn? Nicky is inquisitive and self motivated. For instance Nicky would be curious about how robots work, create one with his erector set, bring it to school and demonstrate and give oral reports for the class. Nicky has
2. How does this student interact with peers and adults? a strong desire to share his discoveries. Children are enthralled with his hands on explanations - as his teacher I applaud his initiative and motivation. Nicky is a sweetie!
3. What are some of this student's distinguishing attributes? Nicky wants to be a scientist but he applies the scientific process to most areas of learning with as much enthusiasm. Nicky also has a sense of playfulness and humor.
4. Would you recommend this student for The Franklin Institute Discovery (science education) Camp? Why? Why not?
Absolutely, Nicky would blossom in a discovery environment - his questions and contributions would certainly be an asset to any group.
5. Please summarize your overall evaluation of this student.
Nicky is a bright, motivated, inquisitive child who is well behaved and easy-going. His background knowledge is extensive and he has an easy recall and relating ability.
